REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest an extrusion molding apparatus having a screw, the screw including a pressure portion, an extended portion arranged on a forward and extrusion port side of the pressure portion, and a kneading portion between the other two portions, wherein the pressure portion has a feed rate per revolution which progressively decreases toward the forward end extrusion port, and the extended portion has a feed rate per revolution which increases toward the forward end extrusion port. The closest prior art, Sato, does not teach a screw having all three portions or the pressure portion having a feed rate per revolution which decreases toward the forward end extrusion port. Additionally, prior art Meyer, does not teach a screw with a pressure portion having a feed rate per revolution progressively decreased toward the forward end extrusion port and an extended portion having a feed rate per revolution progressively increased toward the end extrusion port. The Examiner rescinds the previous rejection upon further consideration and the Applicant's argument pertaining to the structural requirements for a screw to having increasing or decreasing feed rate per revolution.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
